# Dew point and relative humidity lab answers key worksheets

**Name:** \_\_\_\_\_ **Date:** \_\_\_\_\_

**Earth Science**

### Igneous Rock Formation

1. The photograph below shows an outcrop where a light-colored igneous rock is intruded by a dark-colored igneous rock.

The light-colored dark-colored igneous rock is most likely \_\_\_\_\_.

a. granite    b. gneiss    c. basalt    d. quartz

**Answer Key:**

1. The light-colored dark-colored igneous rock is most likely **granite**.

---

Base your answers to questions 2 through 4 on the table and photograph below and on your knowledge of Earth science. The table shows the approximate relative humidity of air at various times. The photograph shows the final-stage upper cloud in the igneous rock.

Relative Humidity	Percentage of Relative Humidity
100%	100%
90%	90%
80%	80%
70%	70%
60%	60%
50%	50%
40%	40%
30%	30%
20%	20%
10%	10%

2. Identify two conditions that are necessary for cloud formation in the atmosphere.

3. Identify the ground rock.

4. Identify two processes that formed the rock.

**Answer Key:**

2. Two conditions for cloud formation are: **cooling of air** and **presence of condensation nuclei**.

3. The ground rock is **granite**.

4. Two processes that formed the rock are: **intrusion** and **crystallization**.

Dew point temperature calculation from relative humidity and temperature. Dew point and humidity class 10. Dew point and rh calculator.

Humidity is the amount of humidity in the air. Why does your body do this? The evaporation of the sweat is to carry the heat of the body. CONDENSE: Change from gas to liquid. The dry bulb thermometer measures the air temperature. But the amount of water vapor air can remain unlimited, so the sweat can only evaporate if the air still has the ability to have more water. Psychrometer: a tool used to measure relative humidity. Relative humidity: the amount of water vapor in a given sample of air compared to the amount of water vapor that can exist in the air of the same temperature. Saturated: full of water. Water vapour: water in a gaseous state. Wet bulb depression: the temperature difference between the temperature of the dry bulb and the temperature of the wet bulb in a cyclometer. Prior knowledge questions (do these before using the Gizmo.) 1. In RelativeHumidity Gizmo, you will use a psychrometer to determine relative humidity. Dew point: the temperature at which the water vapor will condense on a wet surface so fast as it evaporates from it. Evaporate: to change from liquid to gas. 4. Humidity: the amount of water vapor in the air. 5. When you go out on a hot summer day, your body usually starts sweating. Name: Brenda Vasquez Romerorelative HumidityDefine Vocabulary: 1. The second thermometer has If moisture is high, less water can evaporate from the sweat on your skin. The amount of water vapor in the air compared to the maximum air it can contain is known as relative humidity. Do you think sweating cools you more a dry day or a wet day: sweating can be more effective on dry days? A psychrometer has two thermometers.
