Edited by R. Kalvoda and Roger Parsons

Electrochemistry in Research and Development

Electrochemistry communications guide for authors.

Copyright Upon acceptance of an article, authors will be asked to complete a "License Agreement" (see more information on this). Changes to authorship Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi. Karra, S. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. The art of writing a scientific article. Each heading should appear on its own separate line. Pages should be numbered. Appendices If there is more than one appendix, they should be identified as A, B, etc. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study (if any). In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Keywords Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, "and" or "of"). Helyon. Authors wishing to offer mini reviews must first contact the Reviews Editor. Xu, D. To verify originality, your article may be checked by the originality detection service Crossref Similarity Check. Methods that are already published should be summarized, and indicated by a reference. You can add your name between parentheses in your own script behind the English translation. Research data This journal encourages and enables you to share data that supports your research publication where appropriate, and enables you to interlink the data with your published articles. Svyatsky, A. Present the authors' affiliation addresses (where the actual work was done) below the names. Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's Author Services. Examples: Reference to a journal publication: [1] J. Preprints Please note that preprints can be shared anywhere at any time, in line with Elsevier's sharing policy. Supply captions separately, not attached to the figure. Kinkzoon, D. If the funding source(s) had no such involvement, it is recommended to state this. Use of word processing software It is important that the file be saved in the native format of the word processor used. • Size the illustrations close to the desired dimensions of the published version. Papers deemed not to meet the urgency criterion by the Editors will be rejected. Tables Please submit tables as editable text and not as images. When coding terminology is used, we recommend to avoid offensive or exclusionary terms such as "master", "slave", "blacklist" and "whitelist". Data statement To foster transparency, we encourage you to state the availability of your data in your submission. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. Use this numbering also for internal cross-referencing; do not just refer to the text. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature. In contrast, a Calculation section represents a practical development from a theoretical basis. To provide open access, this journal has an open access fee (also known as an article publishing charge or APC). Reference links increased discoverability of research and high quality peer review are ensured by online links to the sources cited. Submission Checklist You can use this list to carry out a final check of your submission before you send it to the journal for review. The abstract should state briefly the purpose of the research, the principal results and major conclusions. No changes from the accepted version are permissible, without the explicit approval by the Editors. Please avoid using vertical rules and shading in table cells. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. It is important to ensure that all corrections are sent back to us in one communication. All authors, including those without competing interests to declare, should provide the relevant information to the corresponding author (which, where relevant, may specify they have nothing to declare). The Editor is responsible for the final decision regarding acceptance or rejection of articles. Berndt, A. A seismic continuation of the Lesser Antilles slab beneath northeastern Venezuela. Peer Review This journal operates a single blind review process. Your preprint will remain globally available free to read whether the journal accepts or rejects your manuscript. For more information about posting to SSRN, please consult the SSRN Terms of Use and FAQs. Use of inclusive language Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Preprints provide early registration and dissemination of your research, which facilitates early citations and collaboration. During submission to Editorial Manager, you can choose to release your manuscript publicly as a preprint on the preprint server SSRN once it enters peer-review with the journal. However, do use bold face, italics, subscripts, superscripts etc. Contributions that fail to meet the criteria mentioned above will be rejected without external review. More information on types of peer review. Feel free to use these free resources to improve your submission and navigate the publication process with ease. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text). List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.). Number them consecutively throughout the article. (the abstract is not included in section numbering), to software [7] E. See also the section on Electronic artwork. • Provide captions to illustrations separately. Do not include footnotes in the Reference list. Full communications are slightly longer papers (a maximum of 25,000 characters including spaces). Role of the funding source You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. Highlights Highlights are mandatory for this journal as they help increase the discoverability of your article via search engines. Any modifications to existing methods should also be described. More details and an example. All contributions will be initially assessed by the editor for suitability for the journal. 2003 (accessed 13 March 2003). Reference to a dataset: [dataset] [6] M. Supplementary information is permitted for full communications and mini reviews but not for short communications. Coon, M. • Number the illustrations according to their sequence in the text. This package can be obtained from, or using anonymous FTP from the Comprehensive Text Archive Network (CTAN) at sites in the USA, United Kingdom and in Germany. Please have a look at the examples here: example Highlights. Please note the format of such citations should be in the same style as all other references in the paper. Similarly for tables and figures: Table A.1; Fig. Artwork Image manipulation Whilst it is accepted that authors sometimes need to manipulate images for clarity, manipulation for purposes of deception or fraud will be seen as scientific ethical abuse and will be dealt with accordingly. For example, a short communication may focus on the particular aspect of a problem or a new finding that is expected to have a significant impact. In some cases this is covered by an open access agreement between the publisher and various funding agencies, university consortia and foundations; current open access agreements may be found here. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. Submission declaration and verification Submission of an article implies that the work described has not been published previously (except in the form of a preprint) and that it represents original work. • Present/permanent address. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. Here you will find everything from Frequently Asked Questions to ways to get in touch. You can also check the status of your submitted article or find out when your accepted article will be published. Proofreading is solely your responsibility. Reference formatting There are no strict requirements on reference formatting at submission. Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi. Please do not: • Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors; • Supply files that are too low in resolution; • Submit graphics that are disproportionately large for the content. Journal abbreviations source Journal names should be abbreviated according to the List of Title Word Abbreviations. • Embed the used fonts if the application provides that option. Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Additional information To ensure the very highest standards, authors must provide an urgency statement justifying the scientific need for urgent publication when they submit their paper. Oguro, S. This responsibility includes answering any future queries about Methodology and Materials. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. During the submission process, after uploading your manuscript, you will have the opportunity to upload your relevant datasets directly to Mendeley Data. Titles are often used in information-retrieval systems. References Citation in text Please ensure that every reference cited in the text is also present in the reference list (and vice versa). If no grid is used, use tabs, not spaces, to align columns, as demonstrated [3,6]. Please check the relevant section in this Guide for Authors for more details. Electrochemistry Communications publishes urgent communications, in the form of short communications (no SI permitted), full communications (longer communications including SI) and invited mini reviews on all aspects of research in electrochemistry. References in a special issue Please ensure that the words "this issue" are added to any references in the list (and any citations in the text) to other articles in the same Special Issue. The Elsevier-Latex package, together with instructions on how to prepare a file, is available from the Publisher. Please ensure that your article corresponds to one of the following article types: Short communications are short papers (a maximum of 20,000 characters including spaces) that present original and significant material for rapid dissemination. Mini reviews (a maximum of 25,000 characters including spaces) should present contemporary topics in the normal review style. Please use "Highlights" in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point). Color artwork Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. Commem. Citation of a reference as "in press" implies that the item has been accepted for publication. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Lipnikov, R. For more information on depositing, sharing and using research data and other relevant research materials, visit the research data page. Math formulae Please submit math equations as editable text and not as images. Article transfer service This journal is part of our Article Transfer Service. This journal includes all products that support Citation Style Language styles, such as Mendeley. In the case of addition or removal of authors, this includes confirmation from the author being added/removed. Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. Add [dataset] immediately before the reference if we can properly identify it as a data reference. Moulton, S. If you are sharing data in any of these ways, you are encouraged to cite the data in your manuscript and reference list. Further information on the preparation of electronic artwork. Nomenclature and units Follow internationally accepted rules and conventions; use the international system of units (SI). LaTeX You are recommended to use the Elsevier article class elsarticle.cls to prepare your manuscript and BibTeX to generate your bibliography. Our LaTeX site has detailed submission instructions, templates and other information. Authors wishing to offer mini reviews must first contact the Editor-in-Chief. Be sparing with abbreviations; only abbreviations firmly established in the field may be eligible. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. 281-304. Reference to a website: [5] Cancer Research UK, Cancer statistics reports for the UK. Web references As a minimum, the full URL should be given and the date when the reference was last accessed. • Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar. If you do wish to format the references yourself they should be arranged according to the following examples: Reference style Text: Indicate references by number(s) in square brackets in line with the text. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Any comments submitted will be forwarded to the authors of the paper under discussion for their response. In particular, do not use the word processor's options to justify text or to hyphenate words. This will be read by the Editors alongside the paper so as to form a view of whether the paper should be sent for rapid review. 163 (2010) 51-59. We suggest using alternatives that are more appropriate and (self-) explanatory than "primary", "secondary", "blocklist" and "allowlist". Please do not convert the docx template to another file type. Sci. If together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. The article should be encoded in ESP-LaTeX, standard LaTeX, or AMS-LaTeX (in document style "article"). We advise to seek gender neutrality by using plural nouns ("clinicians, patients/clients") as default/whenever possible to avoid using "he, she," or "he/she." We recommend avoiding the use of descriptors that refer to personal attributes such as age, gender, race, ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. Mini reviews allow for the treatment of topics in more novel areas of research where a full review might still be premature. Shelf, K. Discussions should contain critical comments on papers already published in the Journal. Formatting of funding sources List funding sources in this standard way to facilitate compliance to funder's requirements: Funding: This work was supported by the National Institutes of Health [grant numbers xxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa]. It is not necessary to include detailed descriptions on the program or type of grants and awards. Full communications are slightly longer papers (a maximum of 25,000 characters including spaces), which should be complete and authoritative accounts of work that has special significance and general interest, presented clearly and concisely. We aim to be the fastest journal in electrochemistry for these types of papers. Areas of interest include, but are not limited to, the following topics: • Fundamental electrochemistry • Electrode reaction mechanisms • Computational and theoretical electrochemistry • Properties of interfaces • Electrochemical surface science • Batteries and power sources • Organic and organometallic electrochemistry • Bioelectrochemistry • Spectroelectrochemistry and sonolectrochemistry. The journal welcomes papers of general interest and relevance to the electrochemistry community. Authors are encouraged to submit their work to the journal. Language (usage and editing services) Please write your text in good English (American or British usage is accepted, but not a mixture of these). Author contributions For transparency, we encourage authors to submit an author statement file outlining their individual contributions to the paper using the relevant CRediT roles: Conceptualization; Data curation; Formal analysis; Funding acquisition; Investigation; Methodology; Project administration; Resources; Software; Supervision; Validation; Visualization; Roles/Writing - original draft; Writing - review & editing, van der Geer, J.A.J., Hanraads, R.A., Lupton, M. The art of writing a scientific article. J. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Declaration of competing interest Corresponding authors, on behalf of all the authors of a submission, must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. The reference style used by the journal will be applied to the accepted article by Elsevier at the proof stage. Urgency All submissions must be accompanied by an urgency statement justifying the need for rapid publication. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. Author signatures are not required. Molins, Advanced Terrestrial Simulator (ATS) v0.88 (Version 0.88), Zenodo, March 25, 2020. Powers of e are often more conveniently denoted by exp. Mini reviews are commissioned by the Editor-in-Chief. Electronic artwork General points • Make sure you use uniform lettering and sizing of your original artwork. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author. • Corresponding author. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Ensure that the following items are present: One author has been designated as the corresponding author with contact details: • E-mail address: Full postal address All necessary files have been uploaded. Manuscript • Include keywords • All figures (include relevant captions) • All tables (including titles, description, footnotes) • Ensure all figure and table citations in the text match the files provided Graphical Abstract / Highlights files (where applicable) Urgency statement (justifying the need for urgent publication) Supplemental files (for full communications and mini reviews only) Further considerations • Manuscript has been "spell checked" and "grammar checked" • All references mentioned in the Reference List are cited in the text, and vice versa • Permission has been obtained for use of copyrighted material from other sources (including the Internet) • A competing interests statement is provided, even if the authors have no competing interests to declare • Journal policies detailed in this guide have been reviewed • Referee suggestions and contact details provided, based on journal requirements For further information, visit our Support Center. Discussion This should explore the significance of the results of the work, not repeat them. If the file is suitable, authors will be produced without rekeying the text. Theory/calculation A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lay the foundation for further work. Most formatting codes will be removed and replaced on processing the article. Short articles include, but are not limited to: discovery or development of new materials, cutting-edge experiments and theory, novelty in simulation and modeling, elucidation of mechanisms. More information on how to remove field codes from different reference management software. Nonlinear adjustments (e.g., changes to gamma settings) must be disclosed in the figure legend. Figure captions Ensure that each illustration has a caption. These keywords will be used for indexing purposes. Superscript Arabic numerals are used for such footnotes. Nakashizuka, Mortality data for Japanese oak wilt disease and surrounding forest compositions, Mendeley Data, v1, 2015. Using citation plug-ins from these products, authors only need to select the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. Please indicate your preference for color, in print or online only. The text should be in single-column format. Reference management software Most Elsevier journals have their reference template available in many of the most popular reference management software products. Any subsection may be given a brief heading. You are urged to consult IUPAC Nomenclature of Organic Chemistry for further information. Authors should ensure that writing is free from bias, stereotypes, slang, reference to dominant culture and/or cultural assumptions. Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. Eventual replies will be published jointly with the original comments. Preprint posting on SSRN In support of Open Science, this journal offers its authors a free preprint posting service. Acknowledgements Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. Journal of Geophysical Research, . The image should be readable at a size of 5 x 13 cm using a regular screen
